Burpee's

Advance Prices for 1902

PARTICULARLY OF

Vegetable Seeds

and Sweet Peas

Including

NOVELTIES

FOR 1902

THE ONION
here shown is
engraved exactly natural
size from photograph taken
by ourselves, of a specimen grown
by one of our customers in New
York. It shows what our
strain of PRIZE-TAKER will
produce the first year
from seed—even in the
Atlantic States. We
have a fine lot of new
seed,—write for
prices if in need
of a large lot.

W. ATLEE BURPEE & CO., PHILADELPHIA, U. S. A.

BURPEE'S NEW
"DRY-WEATHER" CAULIFLOWER,
as grown at Station Farm in Arizona.
Illustration copied from the title
page of The 1900 Official Bulletin.

Burpee's New "DRY = WEATHER" Cauliflower.

Strongest Possible "Official" Endorsement,—from a very dry State.

Although only introduced in 1899, the distinct new BURPEE'S "DRY-WEATHER" CAULIFLOWER has made already a host of friends, particularly in dry sections where it has been generally considered impossible to grow fine cauliflower. The illustration above is from the title page of Bulletin No. 35, issued August 15, 1900, by THE AGRICULTURAL EXPERIMENT STATION OF THE UNIVERSITY OF ARIZONA, Tucson, Arizona. From page 128 of this Bulletin we quote: "Cauliflower is somewhat difficult to grow here, as it requires much water, and most varieties need a damp atmosphere and do not endure so much heat as cabbage."

The varieties that have succeeded best at the Station farm are BURPEE'S DRY-WEATHER and Burpee's Best-Early. The former produced large heads weighing three to ten pounds; and the latter, medium-size ones weighing two to three pounds. This vegetable is such an excellent one when properly grown that it is important that a variety suitable to the region be selected for planting."

Burpee's "Best-Early" Cauliflower. This is the best of all strains of Danish-grown Cauliflowers, of the Early Snowball type. For prices of "BEST-EARLY" and DRY-WEATHER, —see page 9.

BURPEE'S ORIGINAL SUREHEAD CABBAGE

FOR 25 YEARS THE BEST FOR MAIN CROP.

This famous Cabbage, named and introduced by us twenty-five years ago, has gained steadily in popular favor. Hardly any other variety can approach the SUREHEAD in fine quality and uniform reliability in forming solid heads, of good size and superb quality.

Burpee's Original SUREHEAD Cabbage produces large, round, flattened heads of the Flat Dutch type, and is remarkable for its certainty of head. It is ALL HEAD, and SURE TO HEAD, even under unfavorable conditions. The heads are remarkably uniform, very hard, firm, and fine in texture, and ordinarily weigh from ten to fifteen pounds each. It is very sweet flavored, has but few loose leaves, keeps well, is good for shipping, and is just the variety and quality to suit market gardeners, farmers, and all lovers of good winter cabbage. We offer our best American-grown seed at \$1.40 per lb.; in lots of 10 lbs. at \$1.25 per lb.

The illustration above was accurately engraved from a photograph of an average seed-head of this world-famous main-crop "SUREHEAD" Cabbage.

ADVANCE PRICES FOR 1902

PHILADELPHIA, November 14, 1901.

To the Trade:

The issue of this Preliminary List has been purposely delayed because of the unexampled shortages in many lines, it was necessary to get definite information as to the actual results of crops. Of certain seeds—notably some varieties of Cabbage, all Carrots, most Peas and many Tomatoes—prices have materially advanced. And yet we have advanced only where it was absolutely necessary, so that we feel safe in saying **that seeds of equal quality cannot be had for less money, while better seeds cannot be had at any price.**

At this date, all seeds are not yet cleaned and warehoused, so that it is possible that on a few varieties we may be able to *lower our prices*. Should this be the case, full allowance will be made, even on orders already shipped. From present outlook, however, it is more likely that when our GENERAL WHOLESALE CATALOGUE is issued in January, we shall be obliged to mark a number of varieties as “*sold out*.”

We recommend **early orders**. You can gain nothing by waiting, for as stated above, *we guarantee against decline in price*, and further we shall be pleased to **Quote prices by letter or telegram**. As we are “exclusively a mail-order house,” **we employ no travelers** but pay careful attention to enquiries by mail or wire. We ask as a favor that you will **write or wire us**, before being led by lower quotations to place your order elsewhere.

Even at the higher prices of many seeds this season, we think you will be able to *make a better margin of profit* and have a more satisfactory business than for several years past.

We do not carry “two stocks,” but supply at wholesale the same quality of thoroughly tested **Proved Seeds** which have resulted in building, in twenty-six years, what is acknowledged to-day the largest mail-order seed business in the world.

Trusting to hear from you at your convenience, we remain,

Very truly yours,

CITY WAREHOUSE:

475 and 477 North Fifth St.,
476 and 478 York Avenue.

PHILADELPHIA, PA.

SEED GARDENS and Trial Grounds at FORDHOOK FARMS, Bucks County, Pa.

Telegraphic Cipher (or Cable Code)

FOR WEIGHTS AND MEASURES.

The telegraphic cipher word for quantities must always precede the cipher words for seed, but if the same quantity of several varieties is ordered, the cipher word meaning that quantity need be placed only before the first. For example :

Arad Navy Purity, Arnhem Royalty Apple, Malmo Balcony, would mean, ship at once, cheapest route, ten pounds each **NAVY BLUE** and **SADIE BURPEE SWEET PEAS**, five hundred packets each **BURPEE'S ROYALTY** and **APPLE BLOSSOM CUPID SWEET PEAS**, and ten bushels **BURPEE'S STRINGLESS GREEN-POD BEANS**.

Our customers will find this a very inexpensive way of wiring their orders, but we must caution them that care be taken in writing out the messages, as we cannot hold ourselves responsible for errors arising from incomplete messages or incorrect translation.

IMPORTANT.—This telegraphic cipher must be used **ONLY** on orders by telegraph or cable, and never in written orders sent by mail.

Our Cable Address is **BURPEE, Philadelphia.**

BURPEE, Philadelphia,

Is Our Registered Cable Address.

All foreign customers are requested to advise us of their **shortest cable address**. Customers in America who wish to telegraph will also, occasionally, find it useful to use the following additional code.  Please note the **code-words** below that would be used in our **reply**, either by cable or telegram.

FOR OFFERS AND INQUIRIES.

CODE-WORD.	TRANSLATION.
<i>Daubling</i>	Telegraph your lowest prices for
<i>Dean</i>	Mail your lowest prices for
<i>Decoy</i>	Mail your lowest prices for, and send samples.
<i>Defend</i>	Telegraph when goods can be shipped.
<i>Defender</i>	Advise immediately by mail how soon goods will be shipped.
<i>Deform</i>	Can you offer for acceptance by mail ?
<i>Deject</i>	Can you offer any ? If so, telegraph prices.
<i>Delude</i>	Can you offer any ? If so, mail prices.
<i>Derange</i>	Telegraph quantities you can offer of following, with prices.
<i>Descend</i>	State by letter quantities you can offer of following, with prices.

Code-words that will be used in OUR ANSWERS.

<i>Dab</i>	{ In reply to your telegram, we quote for immediate acceptance upon our usual terms for special quotations the varieties named below, provided they are unsold upon receipt of your order.
<i>Dacite</i>	We accept your order for
<i>Dagger</i>	We accept your order for, and shall ship at once.
<i>Dainty</i>	We accept your order for, and shall ship as directed.
<i>Damsel</i>	We offer you for immediate acceptance, subject to being unsold.
<i>Dance</i>	We accept your offer and shall ship as directed.
<i>Dapper</i>	Cannot accept your order for
<i>Dapple</i>	{ Part of your order went forward by freight on expect to ship balance
<i>Darby</i>	{ Part of your order went forward by express on expect to ship balance
<i>Dardanus</i>	Please repeat your message, it is not clear.

Code for positive ORDERS.

<i>Dargie</i>	Send immediately by <i>express</i> following seeds at catalogue prices.
<i>Darken</i>	Send immediately by <i>freight</i> following seeds at catalogue prices.
<i>Darnel</i>	Send immediately by <i>mail</i> following seeds at catalogue prices.
<i>Dare</i>	Send immediately the following by <i>freight</i> , per special quotations.
<i>Dared</i>	Send immediately by <i>express</i> the following, per special quotations.
<i>Darling</i>	Send immediately by <i>mail</i> the following, per special quotations.
<i>Dasher</i>	{ Send at once following ; let the other seeds follow as quickly as possible.
<i>Dashing</i>	{ Have you shipped our order? If not, increase if possible our order for to pounds (bushels).
<i>Datary</i>	{ Send immediately by express. Let balance of order follow by freight.
<i>Dation</i>	Duplicate our last order.

Foreign Orders are invoiced at the **lowest prices** prevailing upon **date of shipment**. In no case (except on Potatoes and farm seeds, subject to fluctuations) will prices be charged higher than quoted herein, while in **case of decline** in any lines our foreign customers (who, of course, cannot be kept so well posted in the value of American seeds) will receive full advantage of any **lower prices** that we may be quoting. Our export trade is increasing every year, and dealers, even in the most distant countries, who intrust their orders to us, can rely upon the same close attention and equally the **most favorable prices** that we are making at the same time, for the same quality and quantity, to American seedsmen.

Terms of Credit.—To regular customers and well-known houses of established credit, all bills bought from this catalogue are due June 1st, without regard to date of purchase.

 Bills purchased **on special quotations**, made by letter, are due three months from date of invoice, or subject to a discount of one and a half per cent. for cash within ten days of date of invoice.

 Unknown correspondents desiring credit are requested to give satisfactory reference in Philadelphia or New York.

Cash Discount.—We allow a discount of **Five Per Cent.** on orders accompanied by a cash remittance, and also on all bills (at catalogue prices) paid within ten days from date of invoice.

The Prices Quoted are those ruling at this date. We expect to adhere to them until the issue of our January catalogue, except where important changes compel us to advance or reduce our prices, when we shall be governed by the market. **10 lbs. and more will be supplied at the rates per 100 lbs.;** $\frac{1}{2}$ lb and $\frac{1}{2}$ bush. at pound and bushel rates; but *smaller quantities will be charged at a higher rate.*

NO CHARGE for Packing or Cartage.—Bags and boxes are charged *at Cost.* After delivering to forwarders in **good order** (as shown by Bill of Lading) our responsibility ceases. **Insurance** will be effected only when so directed.

SEALED PACKAGES.—We make no charge for sealing **pounds, pecks, or bushels**, but, at the low bulk prices quoted therein, we shall charge for putting up in smaller sealed packages, when so ordered, as follows:

In Ounces.—One cent per ounce.

In Quarter-Pounds, Pints, and Quarts.—Two cents for each package.

In Two-Quarts and Four-Quarts.—A charge of three cents per package.

BURPEE'S SEEDS are sold in any quantity, but only under seal. They are always Genuine as dated,—if seal is unbroken.

About Warranted Seeds.

There has been considerable discussion in the trade papers the last few years about warranted seeds, and several seedsmen have criticised the warranty which we have given always,—only to the amount actually paid for the seed. With other reputable seedsmen, who insist upon the usual “disclaimer,” we agree *in so far* that it would be little short of quackery to warrant any seeds invariably to produce good crops. Success is sometimes beyond human control. Under adverse conditions even the best seeds may fail.

We maintain, however, that a Seedsman should know thoroughly the seeds he sells, and after using every possible safeguard, in case of failure from any fault of the seed, should refund the price paid. Further responsibility than this it is impossible to assume. Such a guaranty, however, shows confidence on part of the Seedsman that he is sending out only first-class seeds, and insures the careful co-operation of his employees.

It is necessary, of course, that samples be tested of every lot of seeds, not only for vitality (for even “weed seeds grow”), but also for genuineness and quality of strain. Our complete system of field trials at **FORDHOOK FARMS** (thousands repeated each season) is the most extensive in America, while with our constant watchfulness in filling orders at our city warehouse the chance of mistakes is reduced to the minimum. Should any mistake occur, however, as would be shown by comparison of samples of the same lot tested in our Trial Grounds, we are prompt to refund the price paid. While this does not compensate for any contingent loss, yet it proves that we have more than usual confidence in the thorough care constantly exercised by us in growing and selling

The Best and Only the Best Seeds that Grow.

Burpee's Vegetable Seeds.

TEN POUNDS OR MORE WILL BE CHARGED AT 100-POUND RATES.

This list cancels all previous quotations.

A **Telegraphic Cipher** (or **Cable Code**) is attached to each variety, by which orders can be wired at little expense,—using also our code for weights and measures as given on pages 2 and 3. For example:

Darken Pelew Balcony would mean: Send immediately, by fast freight, forty bushels of BURPEE'S STRINGLESS GREEN-POD BEANS at catalogue price.

Dargie Arad Cage would mean: Send immediately, by express, ten pounds of best select JERSEY WAKEFIELD CABBAGE at catalogue price.

Darnel Amoy Lantern would mean: Send immediately, by mail, three pounds of seed of BIG BOSTON LETTUCE.

Telegrams should be addressed,

W. ATLEE BURPEE & CO., Philadelphia.

Our cable address is: **BURPEE, Philadelphia.**

BURPEE'S "STRINGLESS" GREEN-POD BUSH BEAN

is now acknowledged by all American seedsmen to be the earliest and best of all green-pod dwarf beans. Its popularity with canners and market gardeners, as well as private planters, is already well established.

It is almost equally popular in England, where, unfortunately (as is so often the case with American novelties), it has been widely advertised under two other names.

Early Nutmeg.....	<i>Mallow</i>	30 25 00

Two Specimens of BURPEE'S NETTED GEMS,—engraved from a Photograph.

The Famous "Rocky Ford" Melon is the "Netted Gem" introduced exclusively by us in 1881.

For impartial testimony of this fact (so well known to all seedsmen willing to admit the actual truth), we would refer merchants to pages 74 and 75 of BURPEE'S FARM ANNUAL FOR 1901, and also to page 47 of "BURPEE'S BLUE LIST." Our strain is *extra fine*. We are quite sure it is altogether unsurpassed,—the very best seed in the market to-day of the now famous "Rocky Ford" Melon. If you are offered a lower price, do not be tempted to handle inferior seed of this famous melon, but write to us, stating quantity required, for special quotations on large lots.

Green-Fleshed MUSK MELONS,—Continued.

NOTE.—Ten pounds or more will be Invoiced at 100-pound rates.

All our Peas are hand-picked and of the best samples possible to produce in the past unfavorable season. We advise **early orders**, for while we shall try to **protect our customers**, prices are constantly advancing. While on some varieties we can supply in quantity, it must be distinctly understood that on others (notably *Extra Earlys*, both *smooth* and *wrinkled*) we will decline large orders, unless accompanied by orders for other seeds, of which there is not such a fearful scarcity.

We Devote Special Attention to Growing TOMATOES.

By the most careful continued selection we are enabled to offer strains which produce uniformly smooth fruits, of the most solidly fleshy character and fine quality. These strains have been developed, however, at the expense of the *quantity* of seed produced, and the price of this high-grade seed is necessarily higher than that at which inferior strains can be sold.

TOMATO,—Small-Fruited Varieties.

CHOICEST FLOWER SEEDS.

We make a specialty of the **Choicest Flower Seeds** which we grow extensively, both at FORDHOOK FARMS and with our private growers in America. We have **extra fine stocks**, particularly of ASTERS,—BALSAMS,—BEGONIAS,—COLEUS,—COSMOS,—GLOXINIAS,—Giant Hybrid HELIOTROPE,—Tall and Dwarf NASTURTIUMS (superior to imported seed),—Largest-Flowering PETUNIAS,—PHLOX DRUMMONDII,—SALVIA SPLENDENS, and VERBENA.  We shall be pleased to quote **Special Prices** upon receipt of list of your requirements, stating varieties and quantities. Or you can send **an open order**, in full confidence that prices will be *very moderate* for quality of seed,—a few leading varieties are priced on **page 32**

Complete List of all Known Tall SWEET PEAS.

 Special Low Prices. 

We are acknowledged as **AMERICAN HEADQUARTERS** for Sweet Peas.

 We should refer to our Retail Catalogue for full descriptions of NOVELTIES not specially described herein, and should suggest that with the present widespread interest in Sweet Peas it will pay seedsmen generally to offer more of the **NEW SORTS**, as the margin of profit—between retail and these special prices—is greater than on standard varieties.

 We are not bound by these prices after December, and for quantities only so far as engaged. When our general Wholesale Catalogue is issued in January, probably many varieties will be advanced.

	Telegraph Code or Cipher.	Per lb.
* Admiration (Burpee's) . Delicate shade of rosy lavender,	Admiration	\$0 40

NEW DWARF SWEET PEA,—"CUPID." FLOWERS WHITE.

The above engraving, reduced in size, is an exact reproduction of an illustration in *THE GARDENER'S CHRONICLE*, London, June 29, 1895, of one of the pot-plants exhibited at the Royal Horticultural Society, June 25, 1895, where by unanimous vote we received an Award of Merit for **CUPID**,—the highest indorsement possible.

black-seeded varieties are fully as hardy and vigorous as those of the tall-growing sorts, with similar seed, and can be planted successfully quite early in spring when the trees are starting out in leaf. The white-seeded **White** and **Primrose Cupids**, however, are incased in a thinner or more delicate skin, which will give best results if planted when the weather has become warm enough to plant corn, and can be most successfully germinated by pursuing Mr. Hutchins' new method described in our leaflet, "HOW TO GROW SWEET PEAS," which is sent free if requested on the order. In dry locations, the seed may be sown rather thickly in a drill, as with other sorts, and the plants allowed to grow in a close compact row, forming a beautiful ribbon or border of dark rich green, thickly starred with the brightest blossoms. For heavier moist soils we recommend planting in slightly elevated beds and having the plants stand ten inches or more apart.

ALICE ECKFORD CUPID. Flowers, borne in close clusters of three, are identical in size and coloring with those of the tall *Alice Eckford*. Standard is silvery white with faint stripe of silvery rose in center fold, with suffused shadings of soft rosy pink at the base. Wings of a clear white. **Per lb. 35 cts.; 10 lbs. at 30 cts. per lb.**

BOREATTON CUPID. Flowers of good size, fine bold form, and rich dark coloring. Standard self-colored in a rich wine-brown, with deeper veinings and a satin-like finish. Wings lie closely to the semi-erect keel, deep mauve in shading, underlaid with rosy purple. **Per lb. 40 cts.; 10 lbs. at 35 cts. per lb.**

BURPEE'S BEAUTY CUPID. The handsome large flowers are borne most profusely in clusters of three. The standard is of unusual breadth, with heavily rolled edges, giving a deeply hooded effect; wings broad and erect. Standard rich rose-pink, shading to nearly white at the edges and slightly striped with carmine at the base. Wings suffused rosy carmine, deepening at the edges. **Per lb. 40 cts.; 10 lbs. at 35 cts. per lb.**

COUNTRESS OF RADNOR CUPID. The *Countess of Radnor* is one of the most popular tintings of delicate lavender. In this new **Cupid** we have the same charming tint exactly reproduced with the true compact-spreading **Cupid** growth. Flowers are of immense size, even larger than those of the tall *Countess*, and are borne in the greatest profusion, coming three and four to a single stem. **Per lb. 50 cts.; 10 lbs. at 45 cts. per lb.**

Burpee's Dwarf CUPID SWEET PEAS.

A new and entirely distinct race of Sweet Peas, first introduced by us in 1895, differing as widely as possible from the usual tall vine-like growth, being of low, very compact-spreading form. Plants are seldom more than six inches in height and form a dense mat of richest green foliage fifteen inches or more in diameter. The flowers are fully equal in size to those of the tall-growing varieties, but are placed closely together, generally three or four at the top of a stout stiff stem, seemingly poised just above the surface of the dark-green foliage. The stems branch freely with close joints, and are thickly set with dark-green leaves. The close-spreading growth lying on the surface of the soil serves to keep the latter cool and moist, protecting it from the burning rays of the sun. By reason of this close, dense growth, these **Cupid** varieties have not always proved so successful when planted where the tall varieties grow most luxuriantly; the close growth of foliage does not dry out so quickly after heavy rains as the tall sorts, which are supported on brush and exposed to the drying influence of the air. For light dry soils, however, where the tall sorts quickly dry up or are injured by blight and insects during severe hot weather, **CUPID SWEET PEAS** give the greatest satisfaction,—seeming to revel in the summer heat and flowering in rich profusion. In many sections, the past few seasons, most excellent results have been obtained by planting them in long rows, borders, or masses during the summer months. Protracted dry weather induces them to grow with the greatest vigor and flower most freely. The

BURPEE'S PINK CUPID. This grand variety has the bright pink-and-white flowers of the *Blanche Ferry* type, in the tall or running varieties, of which it is a distinct sport. The editor of *The Florists' Exchange* counted 121 stalks of open flowers on a single plant in our crop (in Jefferson County, New York) under ordinary field culture, averaging three flowers to a stalk. The standard is of a clear bright rose-pink. The wings are lightly suffused with faint rose, but so slightly that they seem pure white in contrast to the bright glowing pink of the standard. A row of this variety in full flower is bright beyond description, having the appearance of being strewn with bright-pink rose-buds. **Per lb. 35 cts.; 10 lbs. at 30 cts. per lb.**

FIREFLY CUPID. Flowers of good size and intense glowing color. The large flowers, borne in close clusters of three, have dazzling scarlet effect of *Firefly* and seem even more intense in glowing color as contrasted with the close dark-green foliage. **Per lb. 50 cts.; 10 lbs. at 45 cts. per lb.**

WHITE CUPID. The first of this new "Cupid" dwarf race. It grows only six inches high and is of close-spreading habit, with rich deep-green foliage. Flowers are borne three on a stout stiff stem, and of the clearest snowy whiteness. **Per lb. 30 cts.; 10 lbs. at 25 cts. per lb.**

PRIMROSE CUPID. The flowers are self-colored in a rich creamy or primrose tint, identical with those of the tall *Primrose*. It is white-seeded and should not be planted until the trees are out in leaf. **Per lb. 35 cts.; 10 lbs. at 30 cts. per lb.**

Burpee's FIFTY NEW CUPIDS, in Mixture.

This Special Mixture includes all the above and also forty colors and varieties which have not yet been separately introduced,—the different colors being blended in suitable proportions. This New Mixture alone contains most of the shades in the Tall Sweet Peas. The flowers range in color from pure white and light pink to dark red and from light lavender to deep purple, while there are several attractive and unnamed striped varieties. We have grown a large crop and are able to sell at so moderate a price that we are sure this superb and showy mixture will make thousands of new friends for our unique **DWARF CUPID SWEET PEAS**.
Per lb. \$1.00; 10 lbs. at 90 cts. per lb.

New Dwarf CUPID Sweet Pea,—Burpee's "ROYALTY."

This beautiful new Cupid resembles the tall *Royal Rose*, one of the very finest self-colored pinks, but the very broad standard makes an even *larger flower*, while the coloring is considerably *deeper and richer in tone*,—hence the new name "ROYALTY." The flowers are of extra large size, well hooded, and of true grandiflora type. The flowers come generally *four on a stem* and closely set together at the top. They are *most desirable for boutonnières* and for designs of *cut-flowers*, as this shade of pink is highly esteemed. Per lb. \$1.00; 10 lbs. or more at 90 cts. per lb.

The Cupids on this page were all first introduced in 1901.

Electro
\$1.25.

Dwarf CUPID,— "APPLE BLOSSOM."

The flowers are of *grand large size*, beautifully hooded and borne *four on a stem*. The standard is very large and broad, slightly pointed with edges well rolled, deeply suffused and veined with deep rose on a silvery ground, shading deeper in the center; wings are quite broad and lie closely about the semi-erect keel; they are heavily shaded in the center with soft rose. Per lb. \$1.00; 10 lbs. at 90 cts. per lb.

*A Stem of
the new
BURPEE'S
"ROYALTY"
CUPID.*

*Engraved from a
Photograph.*

New CUPID,— "CAPTAIN OF THE BLUES."

It retains all the beauty of the tall *Captain of the Blues*, with the very dwarf growth of the Cupid varieties. The flowers, borne in close clusters of three at the top of a very stiff stout stem, are *larger and finer* than the tall *Captain of the Blues*. In color the standard is of a reddish-purple tint heavily suffused with violet; wings very large, of a rich violet-purple,—*approaching deep blue*. As seen in contrast to the rich dark-green foliage, the mass of flowers has quite an effect of rich *deep blue*. This new variety will be one of the most desirable for bedding and borders, and also for cut-flower work as well, where the shorter stems (as compared with the tall sorts) will admit of their use. Per lb. \$1.00; 10 lbs. at 90 cts. per lb.

Burpee's Dwarf CUPID Sweet Pea,—"STELLA MORSE."

This grand new Cupid is identical in rich coloring with the tall *Stella Morse* as introduced by us in 1898, and which is still the most distinctly colored of all the so-called "yellow" Sweet Peas. The flowers of the Cupid strain are distinct from those of the tall parent variety in that they come only two on a stem, but the shading is so charming that this feature is easily overlooked. The standards are also shorter and broader, making the spreading wings equally prominent. The whole flower has a closely hooded appearance similar to that of *Burpee's Beauty Cupid*. The upper edges of the standard are heavily rolled, giving a sharply pointed effect, while the keel is stiffly erect, holding the broad wings closely to the standard. The ground color is a rich creamy buff, tinted with apricot, while the inner portion of the wings is delicately shaded with soft rosy carmine. Per lb. \$1.00; 10 lbs. or more at 90 cts. per lb.

A Plant of APPLE BLOSSOM CUPID,—engraved from a Photograph.

Electro \$2.50.

New Colors of Burpee's Bush Sweet Peas.

Now first introduced for season of 1902.

Burpee's Bush Sweet Pea,—“BLANCHE BURPEE.” This **BLANCHE BURPEE BUSH SWEET PEA** is one of the very finest additions to this most distinct new race. The plants are of dwarf compact

Electro
\$1.25.

BURPEE'S NEW BUSH SWEET PEA.

growth, but erect and freely branched, being fifteen to eighteen inches high when in full flower and frequently of equal diameter. The curling tendrils at the ends of the leaves twine closely about adjoining branches, so that the whole is interlaced together and self-supporting. The flowers are of the pure paper-whiteness, fine bold form, and firm lasting substance, as in the famous tall *Eckford's Blanche Burpee*, but average about two-thirds the size. They are produced in pairs at the top of stiff, slender stems six inches long, and make excellent cut-flowers for bunching in bouquets, etc. See small illustration of a plant herewith, engraved from a photograph. Per pkt. 15 cts.; 2 pkts. for 25 cts.

Bush,—“PRIMA DONNA.”

The “PRIMA DONNA” is a decided acquisition to this grand new race of Sweet Peas, in which the plants grow only fifteen to eighteen inches high when in full flower and which, while branching freely, are stiffly erect and self-supporting. Like those of the tall-growing *Prima Donna*, the flowers are of a beautiful soft-pink tint and self-colored,—the most exquisite shade of flesh pink, a true peach blossom tint. Standard slightly folded and the upper edges heavily rolled; wings nearly erect and well spread, making a fine hooded effect. Sold only in our sealed packets. Per pkt. 15 cts.; 2 pkts. for 25 cts.

Bush,—“SENATOR.” This is a perfect reproduction in flower of the tall-growing *Senator*, one of the very finest striped varieties, combined with the very distinct bush type of growth, which, while well branched and spreading, is *always stiffly erect without support* and only fifteen to eighteen inches high when in full flower. The flowers, while not so large as those of the tall *Senator*, are finely formed, the standard being broad and pointed; wings well spread and heavily rolled. Both standard and wings are silvery gray, heavily striped with brownish claret, changing to a violet-purple as flowers remain open. Per pkt. 15 cts.; 2 pkts. for 25 cts.

Each of the above is sold only in our original sealed packets.

Regular packets, each containing about forty seeds:

Wholesale, \$7.50 per 100 packets; \$60.00 per 1000 packets.

Five hundred packets supplied at thousand rates.

BURPEE'S BUSH SWEET PEAS. This is a new race of entirely distinct growth, first introduced by us in 1899. It has proved very satisfactory in growth and freedom of flower, particularly in light warm soils. The plants are erect, fifteen to eighteen inches high when in full flower, but branching freely so that the close bushes are frequently fifteen inches

and more in diameter, composed of short erect branches with abundant light-green foliage. The tendrils at ends of the leaves clasp themselves closely to the adjoining branches, so that the whole plant is held quite erect though sufficiently open to admit of a freer circulation of air than in the low compact form of the *Cupid* type. The flowers, while not so large, are of as fine form and beautiful coloring as the Tall varieties, and are quite distinct from the *Cupid* type in being borne on long slender stems. As the stems of flowers can be cut with some of the neat attractive foliage, they are most desirable for bunching in bouquets or used as floral decorations.

BURPEE'S BUSH GRAY FRIAR. The first variety of this most distinct type. It is identical in coloring with our beautiful *Gray Friar*. The flowers are borne in twos and threes on quite long stems. The standard is large, stiffly erect, and broadly spreading; wings wide and well spread, edges slightly rolled. The coloring, in suffused shadings and watered veinings, is of lavender-purple on a silvery-white ground. Per lb. 55 cts.; 10 lbs. at 50 cts. per lb.

BURPEE'S BUSH MONARCH. Fine large flowers, generally three in a cluster at top of long stiff stems. The rich dark coloring of the flowers contrast most admirably with the light-green foliage. Standard large and wide, well spread, and of a deep claret or wine-brown; wings heavily rolled, rich purple. Per lb. 70 cts.; 10 lbs. at 65 cts. per lb.

BURPEE'S BUSH BLANCHE FERRY. Plants of true bush growth, with a profusion of fine large flowers of the ever-popular coloring, pink-and-white, as seen in tall *Blanche Ferry*, *Burpee's Earliest of All*, and *Pink Cupid*. The plants grow only fifteen inches in height, come into flower early, and are almost completely hidden by the cloud of beautiful blossoms, which come in three on a long stem. The standard is a soft pink and the wings white, occasionally faintly suffused with rose-pink. Branches are slender, and plants can be grown closely together in a continuous row. Sealed packages only. Wholesale: \$4.00 per 100 pkts.; \$12.50 per 100 half-ounce packages; \$24.00 per 100 ounce packages.

Three Fine New Colors for 1902 of the Free-Flowering Dwarf Burpee's Cupid Sweet Peas.

Of Surpassing Loveliness; Hardy and Vigorous Growth.

New Dwarf CUPID Sweet Pea,—“AMERICA.”

In this new variety we offer the brightest-striped flower in combination with the distinct carpet-like growth of the Cupid Sweet Pea. The *large flowers* are produced in threes at the top of a stiff stem four inches long, and are extremely bright and showy in contrast with the rich dark-green foliage. The standard and wings are very broad and spreading, being of the true *Grandiflora* form, showing effectively the bright blood-red stripings on silvery white ground. The color is most showy and pleasing. *Sold only in sealed packets each bearing our registered trade-mark.* Per pkt. 15 cts.; 2 pkts. for 25 cts. Wholesale, 7.50 per 100 pkts.

New Dwarf CUPID Sweet Pea,—“HER MAJESTY.”

A very pleasing shade of deep rosy-crimson, a solid bed or row of this variety being intensely glowing in the warm sunshine. The color is one of the lighter and softer shades of bright glowing red. The flowers are the same in form and coloring as those of the tall *Her Majesty* (one of Eckford's finest varieties), and are even *larger in size*, the standards being much broader at the base. They are self colored in a soft shade of rosy-crimson, slightly deeper in the wings than in the standards. Per pkt. 15 cts.; 2 pkts. for 25 cts. Wholesale, \$7.50 per 100 pkts.

New Dwarf CUPID Sweet Pea,—“LOTTIE ECKFORD.”

In the tall *Lottie Eckford* we have the same beautiful shades and blendings as in the popular *Butterfly*, combined with larger size and more finely finished form. This beautiful blending of most attractive tints will be a great addition to the list of Cupid Sweet Peas, when growing either as a bedding or pot plant as well as for furnishing small bouquets, etc. The flowers are of large size with broad slightly rolled standard, and the broad wings widely spreading. Both standard and wings are clear silvery white, outlined or edged with rich purple-lavender with fainter shadings of the same color frequently shading the inner portions. Per pkt. 15 cts.; 2 pkts. for 25 cts. Wholesale, \$7.50 per 100 pkts.

Each of the above is sold only in our original sealed packets.

Regular packets, each containing about forty seeds :

Per pkt. 15 cts.; 2 pkts. for 25 cts.

Wholesale, \$7.50 per 100 packets; \$60.00 per 1000 packets.

Five hundred packets supplied at thousand rates.

Special for 1902. While these new colors of BURPEE'S BUSH and CUPID SWEET PEAS, as usual the first season, are *sold only in sealed packets*, we have lowered the retail price to 15 cts. per pkt., or any two packets for 25 cts.,—and each packet will contain about forty seeds.

Two Awards at the Paris Exposition in 1900

The Only First Prize on Sweet Peas was awarded to our exhibit of sixty varieties, all produced from our American-grown seed, of identically the same quality as sold to our customers. Large bouquets of the Tall varieties were shown in connection with pot-plants of the DWARF CUPID and BURPEE'S BUSH SWEET PEAS. These were grown specially for us by a skilled gardener in the vicinity of Paris, consequently were exhibited in first-class condition,—securing for us “**the only first prize on Sweet Peas.**” It was fairly considered the finest exhibit of Sweet Peas ever made on the continent of Europe.

Two Specimens of BURPEE'S NETTED GEMS. Engraved from a Photograph.

Burpee's NETTED GEM ("Rocky Ford") Melon.

Introduced by us twenty-one years ago, this variety has made Colorado famous for its celebrated "ROCKY FORD" Melons.

This splendid variety was named and introduced by us twenty years ago. It is the finest small-fruited melon yet in cultivation. Fruits even and regular in size, generally nearly a perfect globe, but sometimes slightly oval, as shown in the illustration. They are always finely netted and of a golden yellow hue when ripened. The flesh is light green in color, melting and luscious in flavor. Vines of strong healthy growth, very prolific, and fruits ripen early. Our extra selected superb strain is strictly A No. 1,—the best it is possible to produce. In lots of 10 lbs. or more 35 cts. per lb., while large buyers will please write for special prices, stating quantity required.

Extra Early Long-Keeping Australian Brown Onion

Australian Brown in the short period of five years has become already the most popular onion in many localities, especially where the seed is planted in the fall for an early spring crop. It never fails to bulb, although in dry, warm locations they sometimes ripen prematurely from spring-sown seed without attaining full size. The greatest feature of this distinct new variety is its splendid keeping quality. We have numerous instances of bulbs being kept in excellent condition until those of the succeeding year were fully ripened. Even small sets of this variety kept in a cool place do not start into growth until the second year from sowing the seed. No other onion has such a record for keeping qualities. Per lb. 60 cts.; 10 lbs. or more at 55 cts. per lb.

Three Superb Strains of TABLE CORN.

Unequaled Novelties Named and Introduced by W. Atlee Burpee & Co.

Burpee's Early "COSMOPOLITAN."

Undoubtedly the Largest-eared and Best Early True Sweet Corn. This grand new variety produces fine large ears three to five days in advance of *Early Metropolitan*, and only a few days later than *First of All* or *Early Fordhook*. In size of ear and fine quality it equals the best second-earlies, such as *Crosby*, *Champion*, and *Metropolitan*. The stalks grow five to six feet in height. The ears are of most handsome appearance, fully nine inches long, with ten or more rows of large grains. The cob is pure white and the ear holds its thickness throughout the entire length and is well filled, the grains at the top making a round point to the ear. In this "ideal form" there is no waste, while the appearance is most attractive. The dry seed, without being flinty in the least degree, is firm, of large size, and germinates unusually well from early plantings. In fact, the "COSMOPOLITAN" planted early gave us our first ears for the table at FORDHOOK,—the other extra early sorts not doing well on account of a very dry season. The ears are just the right market size. It is most desirable to plant at intervals throughout the season for a succession of crops. In vigor of growth, freedom from smut, handsome appearance, fine quality, and earliness, **Burpee's New COSMOPOLITAN is the best large early Sweet Corn that has ever been developed.** Both in quality and yield it is sure to delight all lovers of the choicest sugar corn. **Per bushel \$4.25; 10 bushels at \$4.00 per bushel.**

Burpee's Earliest SHEFFIELD Sugar Corn.

Hardy as Adams; Early as "First of All."

This new extra early is the result of a cross between the *Cory* and *Extra Early Adams* by DR. VAN FLEET, the well-known hybridizer. It combines the robust growth and extreme hardiness of the *Extra Early Adams*, with the finer sugary quality of the *Cory*. Ears average six inches in length and are well filled with grains of medium size arranged in ten or twelve regular rows. The grains are juicy and of fine, sweet flavor if gathered at the proper stage. It is as hardy as the *Adams*, ready for use earlier, and of much sweeter quality. One of its strongest recommendations as a market variety is the entire freedom from smut, which so frequently destroys extra early corn. **Per bush. \$3.50; 10 bushels at \$3.25 per bushel.**

Earliest SHEFFIELD is "the best extra early corn, all points considered," so writes MR. C. S. CLARK, the well-known grower of Ohio, under date of December 20, 1900. In another letter (quoted in the "Quarter-Century" FARM ANNUAL of last year) Mr. Clark wrote:

"I say again, as I did last year and have all along, that the SHEFFIELD has more good points than any other early sugar corn in cultivation to-day. Its strongest point, and one of great merit, lies in the fact that it **does not smut**. The ears are so prettily shaped, and when in the green state white as chalk. No glaze grows in it to speak of, therefore it must be sweet. Its light weight also proves that it is free from glaze and smut. You should make an awful push on this corn. It is a picture in corn. I could make no other stronger claims on any corn than this."

Burpee's "DREADNAUGHT" Adams Early.

With larger and handsomer ears than the regular strain, this also has the sweetness of the young tender grains developed to a much greater degree. Planted at the same time as our new *Cosmopolitan* at FORDHOOK FARMS, this variety gave us very fine ears for the table about four days later, making an excellent succession for that variety, and was ready as soon as the regular strain of *Adams Early*. The seed is hard and well ripened, making it safe to plant very early. The stalks are strong and vigorous, averaging seven feet in height, well bladed, and with one or two good ears to each stalk. The ears are slender, having a small white cob, and measure from ten to fourteen inches in length, with twelve or more rows of small pearly-white grains. If gathered for the table or market at the proper stage these grains are of fine quality and decidedly sweet flavor. We can confidently recommend this improved variety for an early supply of fine ears for the table or market, while any portion of the crop not needed for the table will make fine ears for stock feeding, and the fodder can be cured for winter use. **Per bushel \$2.50; 10 bushels at \$2.25 per bushel.**
